STATE OF CALIFORNIA

CALIFORNIA INTEGRATED WASTE MANAGEMENT BOARD

Base Year Modification Request Certification

Part 2: Generation Study - Includes Extrapolation of Residential or Non-Residential Diversion Data

To request a substitution for a previously approved base-year used in calculating the diversion rate for your jurisdiction, please complete and sign this form and return it to your Office of Local Assistance (OLA) representative at the address below, along with any additional information requested by OLA staff. When all documentation has been received, your OLA representative will work with you to prepare for your appearance before the Board. If you have any questions about this process, please call (916) 341-3199 to be connected to your OLA representative.

Mail completed documents to:

California Integrated Waste Management Board Office of Local Assistance 1001 I Street, 9th Floor PO Box 4025 Sacramento, CA 95812-4025

General Instructions:

Please select the ONE choice below that best explains your request to the Board.

- 1. Use a recent generation-based study to calculate our current reporting-year generation amount, but not officially change our existing Board-approved base year.
- 2. Use a recent generation-based study to officially change our existing Board-approved base year to a new base year.
 The shaded cells on these sheets are protected. If you have problems using these sheets, please contact your Office of Local Assistance representative.

Section II: Information for New Generation-Based Study

Attach additional sheets if necessary— reference each response to the appropriate cell number (e.g., 4).

Note: New base years must be representative of a jurisdiction's disposal and diversion.

1. Current Board-approved existing base-year:	2. Proposed new generation-based study year:
1990	2002

3. Explain how the proposed generation study year is representative of average annual jurisdiction disposal and diversion:

This new generation number reflects the current disposal and the diversion practices in the year 2002. The number of residents and commercial businesses in the jurisdiction has grown considerably. As a result, the amount of C&D waste has also increased. Eight new C&D facilities operate in San Diego County since 1991 and one of the exisiting ones started recycling inert materials in 1995. The Department of Public Works - Roads Division began several waste diversion programs since 1990 as have the major landfills in the County. This dynamic change in the jurisdiction makeup was not accurately reflected in the initial study conducted in 1990. Equestrian centers and golf courses, which were not represented in the 1990 Base Year Study, continue to be a significant part of the waste stream. In addition to the growth, the City has implemented, and maintained numerous diversion practices in the last twelve years. These programs are now appropriately reflected in the new diversion study.

4. Enter your diversion rates below.					
Diversion rate calculated using existing base year		35%	Diversion rate calculated using new generation-based study	b. 51%	
For existing base year pounds/person/day based on			For new generation based study pounds/person/day		
generation		9.0	based on generation	14.1	
Residential Non-Residential generation 38% generation		62%	Residential Non-Res generation 14% generati		
Population existing generation-based study	3	98,734	Population new generation-based study 45		

5. If there is an increase between 4a and 4b, please explain how the new diversion rate is consistent with your current diversion implementation efforts. If the proposed new generation tonnage results in an increase in your pounds/person/day, please explain how this is consistent with your current diversion implementation efforts and provide examples, e.g. change in jurisdiction's demographics.

The County unincorporated experienced huge growth in construction activities between the time of the original base year and the new base year. New programs were put in that diverted construction and demolition waste that was not adequately accounted for by the CIWMB Adjustment Method. The increase in construction added to the overall generation and the accompaning diversion activities were not accounted for in the original base year study. Eight new construction and demolition recycling facilities that process wastes were sited and recycled waste from the County uninicorporated area, while one of the existing facilities began recycling inert materials in 1995. The County has expanded and improved diversion programs continually.

6. If the difference between the proposed diversion rates in 4a and 4b is greater than 5 percentage points, please explain the specific reasons for the difference. (For example: new/improved curbside diversion programs.)

The County unincorporated experienced huge growth in construction activities between the time of the original base year and the new base year. Eight new construction and demolition recycling facilities that process wastes were sited and recycled waste from the County uninicorporated area, while one of the existing facilities began recycling inert materials in 1995. The County has expanded and improved diversion programs continually. The new diversion rate also is indicative of the new and expanded programs implemented under the 1066 extension.

- 11. For each restricted waste type [(i.e. agricultural waste, inert solids (e.g. concrete, asphalt, dirt, etc.), scrap metals and white goods (PRC Section 41781.2)] and associated program, please provide the following information:
- a. If the diversion program started on or after January 1, 1990, complete the following table:
 (Note: program name refers to one specific diversion program for that waste type, for example diversion conducted by City Public Waste Dept.)

Restricted Waste Type	Specific Program name	Year started	Tonnage
Inert Solids	Recycling Programs at New C&D Facilities	1991	299,948
Inert Solids	Recycling - Non Extrapolated Restricted Materials (Inorganics)	1990	56,020
Inert Solids	Source Reduction Programs at Landfills	1995	6,082
Inert Solids	Source Reduction - Non Extrapolated Restricted Materials (Inc.	1990	8,063
Inert Solids	Recycling Programs by DPW - Roads Division	1998	16,323
Scrap Metal	Recycling - Non Extrapolated Restricted Materials (Metals)	1990	1,428

b. If the diversion program started before January 1, 1990, on a separate sheet, marked attachment 11b, provide	ine
following documentation: (Note: If documentation for a waste type and program has already been approved by the	Board,
you do not have to provide an attachment 11b for that waste type and program. Instead	
please provide date of Board approval of previous submitted information.)	(Date)
If documentation is not available, go to 11d.	
§ How the diversion was the result of a local action taken by the jurisdiction, which specifically resulted in the	diversion

- § How the diversion was the result of a local action taken by the jurisdiction, which specifically resulted in the diversion [PRC Sec. 41781.2 (c) (1)].
- § That the amount of that waste type diverted from the jurisdiction in 1990 was less than or equal to the amount of that waste type disposed at a permitted disposal facility by the jurisdiction in any year before 1990. (Note: this criterion is applicable to the entire jurisdiction, not to individual programs [PRC Sec. 41781.2 (c) (2)]). Please include documentation.
- The jurisdiction is implementing, and will continue to implement, the diversion programs in its Source Reduction and Recycling Element.

c. If the diversion program started before January 1, 1990, and the documentation requested in 11b is available (but not yet approved by the Board), complete the table below for each program claimed:

Restricted Waste Type	Specific Program Name	New base year or reporting year diversion tonnage

d. If the diversion program started before January 1, 1990, and the documentation requested in 11b is not available, please complete the table below for each program claimed. (Note: Only the difference between the new base year/reporting year and 1990 can be counted in the diversion rate calculation.)

Restricted Waste Type	Specific Program name	New base year or reporting year tonnage	1990 diversion tonnage	Difference
